

MicroSafe® Automated 360° Disinfection System

"Antimicrobial efficacy claims relate to the disinfectant (Nanocyn Advanced), not the device itself."

- **RAPID.**
- **NO TOUCH.**
- **MINIMAL DOWNTIME.**
- **HOSPITAL-GRADE DISINFECTANT.**

Use the MicroSafe 360 machine with Nanocyn Advanced, a hospital-grade disinfectant for hard, non-porous surfaces. Based on hypochlorous acid (HOCl), it is ready to use, water based and pH neutral. Operate the machine to the manufacturer's instructions and always follow the Nanocyn Advanced label.

The MicroSafe 360° System Works Quickly:

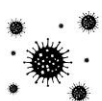

Misting Duration

Disinfection cycle typically completes in approximately 1 to 2 minutes, depending on room parameters.

After Room Treatment

No wiping or rinsing needed when used as directed.

360° Automated Disinfection Coverage

Applies ARTG listed Nanocyn Advanced across the room in accordance with its directions for use.

Fully Automated Precision

Completely automated, reduces human error and ensures consistent coverage.

Rapid Room Reopening

The room can be reopened once the contact time on the disinfectant label has passed.

Designed With People In Mind

Start the cycle, step out and close the door. Operate to the manufacturer's instructions.

MicroSafe[®] Automated 360° Disinfection System

"Antimicrobial efficacy claims relate to the disinfectant (Nanocyn Advanced), not the device itself."

Automated Whole Room Application Process

Use the MicroSafe 360 with Nanocyn Advanced

Hospital-grade disinfectant

For hard, non-porous surfaces

Based on hypochlorous acid (HOCl)

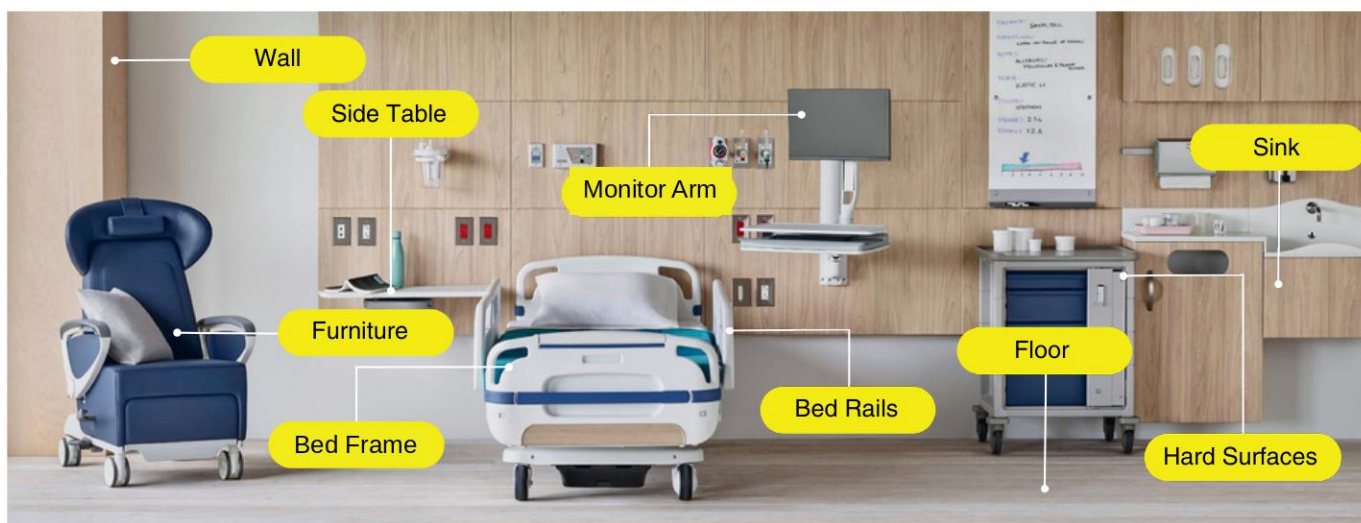

Ready to use

Water based, neutral pH

Claims apply to the disinfectant, not the device.

Always read the Nanocyn Advanced label and follow the directions for use. Operate the machine to the manufacturer's instructions.

360° Coverage You Can Trust

For hard, non-porous surfaces. Always read the label.

Claims apply to ARTG listed Nanocyn Advanced, not the device, when used in accordance with its directions for use.
